Kyrgyz Software and Services  
Developers Associations

2008

# Idea

[Kyrgyz Software and Services Developers Association](#) (KSSDA) was established on 23 of July in 2008. It is an association of companies involved in IT industry, ready to offer the government and society a new path of economic development based on:

- innovations;
- knowledge;
- creativity;
- potential of human resources.

Mission of Association - We have neither oil nor gas, and also we have no access to the sea. But we have talented people, beautiful nature which gives energy and inspiration. And so internet became our sea, ocean of opportunities. We will create a powerful modern industry of software development to enter the global market and for the development of the local economy in Kyrgyzstan. We will contribute to reduce the digital divide between urban and rural areas. We will involve a large number of young people to the profession, create jobs with better tax preferences for them and they will be the basis, the core of the future of the “creative class”, a class of free and happy people.
